## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Status of Application: Claims and Amendments***

Applicant is notified that the amendments put forth in Paper 24, 5/27/03, have been entered in full.

Claims 13-15, 17-21, 23-28, 35-51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 24. Additionally, Applicant is reminded that the claims will be examined only to the extent that the claims read on the elected species of hedgehog protein, i.e. desert hedgehog, as set forth in Paper 22, item 7.

At page 8 of Paper 24, Applicant traverses the restriction requirement yet offers no arguments as to why the requirement might be improper; therefore this aspect of the restriction requirement is treated as an election without traverse. Additionally, Applicant asserts that the species election is for search purposes only. It is not entirely clear as to what applicant's intended meaning is, however, it is pointed out that the restriction set forth that the recited species were independent and patentably distinct species of invention. The restriction requirement is deemed to be proper and is therefore maintained and made final.

### ***Response to Amendment***

Applicant is notified that any remaining rejection or objection that is not expressly maintained in this Office action has been withdrawn in view of Applicant's amendments.

Art Unit: 1646

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 7, 9 33 and 34 are provisionally rejected under the judicially created doctrine of double patenting over claims of copending Application No. 08/900220. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: an isolated and/or recombinantly produced polypeptide consisting essentially of a sequence identical to either SEQ ID NO: 17 or an N-terminal fragment of SEQ ID NO: 17 having an molecular weight of about 19 kD, which polypeptide binds to a patched protein or promotes proliferation of testicular germ line cells.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
